## Die Lungenkrankheit Sars

Das Schwere Akute Respiratorische Syndrom ist eine durch Coronaviren ausgelöste Infektionskrankheit. Sie breitete sich in den Jahren 2002 und 2003 weltweit aus.

Für die aktuellen Sars-Fälle in Asien, die von einer neuen Variante des Coronavirus verursacht werden, liegen noch keine gesicherten Erkenntnisse vor. Ansteckung und Krankheitsverlauf können sich unterscheiden.

After that, the best thing you can do is that your heart is reviewed to the world. In case of appearance, you must perform several tests for three to six months in the world. During this time, you should only train not very stressful. After a different hospitalization course, athletes must take a look at the only two weeks after the end of the symptoms and follow the advice of the music. The sports dicos of the University of Ténica must recommend a sports suitability exam that includes an ECG at rest even when the symptoms occur. By Hendrik Maaßen and Anne Armibrecht the commitment of Hendrik Wagner in the European handball championship in early years against Sweden just a fifth minutes. The 24 -year -old man achieved three, four attacks and one goal before complaining of respiratory problems. The debut in EM ended prematurely for the German hawk player. He has no "air," he said. The consequences are particularly important. This problem from his everyday life knows only too well. He also has a certain point of understanding. But pressure and false ambition could be done, he says - even in the event of a cardiac participation. A subordinate lung disease can also cost a professional at least the career. Anyone who gets into fruits risks permanent damage. "It is of course a job. It is great pressure from the club, from the bans, perhaps also from the athletes themselves," says Halle. "There is actually the regulating person of the person who has to be steadfast there and say: it doesn't work. You have to shout the patient". Most recreational athletes in particular catch on most of the athletes are responsible and could also put their body well. In the leisure area in particular, the doctor always sees it again and again that people start again and with too high intensity. Halle is also able to do this for the reason because the care is missing in the amateur area. Not everyone can be checked completely after an illness. Many also go through an infection without knowing about it. Cardiologist Rät: Hobby athletes also advocate mindfulness on the body. "If I had a slight infection or was only tested positively, I would say that after two weeks you can do full sport again. Tambiä © n For a week, then three or four days easy, from the tenth day a little more intense. I can do everything for two weeks. " If, on the other hand, the disease was accompanied by several days and thus accompanied a lung participation, Halle has a break for an additional week. In the event of a cardiac participation, there are even strict ban on sports at least three months.
